LinkedIn : <https://www.linkedin.com/in/nethmi-sadeesha-3a9266399>

GitHub : <https://github.com/NSadeesha>

Highly motivated software engineering undergraduate with hands-on experience in full-stack web development, mobile app development, and database-driven systems. Skilled in building responsive web applications using MERN, Java, and PHP, along with developing Android apps using Kotlin. Strong problem-solver with experience designing clean UI/UX, implementing real-time features, and working with modern development tools. Fast learner with a passion for creating efficient, user-focused solutions and eager to contribute to innovative software projects through an internship opportunity.

SKILLS

Programming Languages

Python, Java, JavaScript, Kotlin, PHP, C, C++, R

Technical Skills

Web Development: React, Express.js, HTML, XML, Node.js, MongoDB, CSS, Tailwind CSS

Frameworks: React.js, MERN, .NET, Express.js, Node.js

Mobile Development: Android Studio, Figma

Databases: SQL, MongoDB

Tools and Platforms: GitHub, Git, Jira, VS Code, Visual Studio, Android Studio, Postman, JUnit
Selenium, SQL Workbench, Docker, Kubernetes

Soft Skill

- Strong organizational skills
 - Excellent communication skills, developed through presentations and team collaboration.
 - Critical thinker with the ability to analyze complex problems and devise effective solutions.
-

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

- BSc (Hons) Information Technology specializing in Software Engineering
Third-Year Student Expected Graduation: 2027

Southlands College, Galle, Sri Lanka

- GCE Advanced Level Examinations (GCE A/L) in Physical Science Stream (3S)

British Way English Academy

- Advanced Certificate
-

PROJECTS

- **MEDIGO – Healthcare Management Microservices System**

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), Docker, Kubernetes, Nginx, JWT Authentication, Postman, GitHub

Developed a scalable healthcare management system using a microservices architecture. Built and managed multiple independent services including authentication, patient management, doctor management, appointments, payments, telemedicine, notifications, and medical reports. Implemented RESTful APIs, secure JWT-based authentication, and inter-service communication. Containerized services using Docker and deployed them using Kubernetes with NodePort networking and Nginx reverse proxy configuration. Collaborated in a team environment using GitHub and followed modern backend development and deployment practices.

- **EnergyMate – Smart Household Energy Management System**

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT Authentication, Postman, GitHub

Developed a full-stack web application focused on helping households efficiently monitor and manage energy consumption. Contributed to the development of the Household Management, Feedback, and Support Ticket modules as part of a team project. Implemented secure authentication, CRUD operations, RESTful APIs, and responsive UI components to improve user experience. Designed features for managing households, tracking appliance usage, submitting feedback, and handling customer support requests. Collaborated using GitHub and followed modern software development practices.

- **Driving School Management System(ITP)**

Technologies Used: MERN Stack (MongoDB, Express.js, React, Node.js)

Developed a full-stack web application to streamline driving school operations, including student registration, lesson scheduling, vehicle assignment, and instructor management. Implemented secure authentication, real-time data updates, and responsive UI for administrators, instructors, and students. Integrated maintenance tracking and inquiry handling to improve operational efficiency.

- **Inventory Management System(OOP)**

Technologies Used: Java, MySQL, HTML, CSS, JavaScript

Developed a web-based Inventory Management System to efficiently manage stock and products. Implemented features for adding, updating, and deleting items, tracking quantities, managing prices, and searching/filtering products, with a user-friendly interface for easy access and operations

- **Library Management System(OOC)**

Technologies Used: MySQL, HTML, CSS, JavaScript, PHP

Developed a Library Management System to streamline library operations. Implemented features such as book catalog management, user registration, book issue and return tracking, due date reminders, and search functionality. Designed a user-friendly web interface to improve accessibility and ease of use.

- **Finance Tracker Mobile App**

Technologies Used: Android Studio, Kotlin

Developed a Finance Tracker mobile app to help users manage daily expenses and monitor spending patterns. Implemented features for adding transactions, viewing expense summaries, and tracking budgets through an intuitive and user-friendly interface. Focused on providing clear visual insights to support better financial decision-making.

- **Daily Habit Tracker Mobile App**

Technologies Used: Android Studio, Kotlin

Developed a Daily Habit Tracker mobile app to help users build consistent routines and monitor personal goals. Designed an intuitive interface for adding habits, setting reminders, and tracking daily progress. Focused on providing a simple, engaging user experience to support long-term habit formation.

- **Online Shopping Mobile App**

Technologies Used: Figma (UI/UX Design)

Designed and prototyped a mobile Online Shopping Store that delivers a smooth and engaging shopping experience. Created a modern and intuitive UI in Figma with seamless navigation for browsing products, managing carts, and viewing product details. Focused on clean layouts, accessibility, and interactive design elements to enhance user engagement. Designed user-friendly flows for login, checkout, wishlists ensuring a simple and efficient mobile shopping experience.
